About Me

I am an individual passionate about all things technology, always looking for new opportunities. I am currently searching for a new part-time job that will help me gain more experience to sustain me through university. I would be able to work full-time hours during the holidays.

Future Ambitions

I would like to become a software engineer for a technology company – for a big Fortune 500 company. I would like to be a part of a team that creates software to make people’s lives easier.
